

Don't let the CyberGrinch steal your holidays

Companies report an increase in cyber crimes on Cyber Monday

\$3.4

Million per hour can be lost in a Cyber Monday attack

One single hour of disruption due to a Cyber Monday attack can cost up to \$3.4 M in losses and remediation costs, or worse, put your company out of business.

30%

Employees will click a malicious link on a work computer

Most of these links will come in the form of emails masquerading as sale coupons from the top 5 major retailers.

70%

Employees will work remotely - many utilizing public networks

A high percentage of remote work during the holiday season, leads to more pathways for vulnerability e.g. employees logging on to an unsecured network from the airport, hotel or a coffee shop.

of these breaches can be eliminated

Prevent web-based threat vectors and reduce your attack surface with Isla Malware Isolation Platform.
