India’s Cyber Threat Landscape

4th Most Targeted Country in the World for Cyber Crime

India is the 2nd most impacted by bots, and 3rd most impacted by network attacks and 4th most targeted country when it comes to cyber crime.

40% of Attacks Originate in China

While cyber threats in India originate all over the world, 40% of those threats begin in China, followed by 25% of threats coming from the United States.

12 crores

Average Cost to Repair

The average cost to repair a breach in India adds up to ₹12 Crores and an average of 99 days to contain.

73% of Attacks are Web-based

73% of exploits used in malicious attacks come from the web.

What if You Could Eliminate 100% of these Breaches?

Instead of detecting and predicting future attacks, isolation technology can be used to eliminate the threat of web-based attacks.
